What is Love?

What is Love? I asked a maldet.

Beaming bright in beauty's sky,
Love she know, and with it leden,
Were the arrette in her eye;
Blushes soft came o'er for stealing, Low her words of music fell :Love's a strange, delicious feeling,
Whit it is-I cannot tell."

What is Love? I eaked a mother, Bonding o'er her first born shild; O I the bliss she could not smother, As she looked at me and amited. Bomething bolier than pleasure
Lit the fire within her eyes,
God had given her a treasure,
And she loved the hely prize,

What is Love? I asked the glory Of my household and my life. When in ther years the story Of my passion won a wife : Doep in mine her glances glowing, Barned with love and golden glee, White her arms around me throwing Riszes sweet she gave to mo.

What is Love ? Of brightest angel?
Will thou not thyself unroll?
Let I feel thy soft erange!
Entribe waters of my soul,
Love is joy divinely given
To the couls of earth again. Binding heart to heart and heaven, With God's own electric chain.

So stand matters now and the election at and. The strife will be whether the alli ance shall retain power another year, or better men take their place. Have the trio done anything to give them the position they claim? the rillage is against them. Many electors fear the power of Smith and Sutherland in their private relations. I think it is needless -they would not dare oppress a man for voting contrary to their wish. They boast that they will oust Hunter by any means .-Let them "bide a wee,"-they are not yet elected themselves. Nay, I question whether it will try Sutherland's feelings much Smith should fail in re-election (notwithstanding the Recreship management last year.) It would savor much of one of Donald's schemes to make a catspaw of Smith last year, and even gently minister to his defeat on this occasion. Smith is a greater fool than I take him to be if he thinks he can rely on his chief friend in the Alliance. Let him depend upon it, he has neither for gotten nor forgiven their little passages of by-gone years. Sutherland is probably even now making advances to the opposite party, with a view of bestowing a final kick on Smith (he being no longer useful). It would seem they have already determined on sacking Davison for McCracken, as "the tools, the broken tools, that tyrants cast away."

The two chiefs of the Alliance count strongly on assistances from the Roman Catholic vote: but I think they will be led by no one. And now a word with them. them not be misled and biased by secret insinuations against any man, but judge fairly of those who seek their suffrages by past acts and character. When a man is guided by his feelings instead of his judgement, he generally goes astray. But above all, let there be no tempering with principle on the part of anyone. If the village really does, as it loudly says, condemn the past actions of these men, let it speak as loudly at the polls. The village presented a stick to Hunter to mark their appreciation of his conduct as Reeve: let them now, with equal justice, prepare a rod for the backs of those who de-Annual value on a acre and House on Church | ceived them, as a memento of their broken

Sta,-We have heard, last Friday, a lecture on "The Beautiful and its Uses," by

Rev. Mr. MARLING, of which I will give you an analysis and a criticism. Analysis. Beauty and the beautiful are

on the lips of all, and, however, philosophers are far from agreeing on their nature and their source. Some say beauty is in objects, others that it is only in the mind. I have no new theory. If it is difficult to define beauty in the abstract, it is not so difficult to describe it in the concrete, that is in the objects in which it resides. Passages from poets showing that everything is beautiful in nature, and that " a thing of beauty is a joy for The uses of the beautiful are-1st-a live-

TO LET,

On the Management of Barn-Yard Manure.

Whatever system is adopted in the management of manure, the three principal objects should be, (1) to preserve all the 11quide, (2) to prevent leaching, and (3) to avoid too rapid fermentation.

In cold weather, fermentation proceeds co clowly that we need apprehend little loss from this cause. Our principal danger is from the soluble and more valuable portions of the manure being leached out by heavy rains in the fall and spring, and, in some sections, during the winter months. We cuffer more from this than from all other causes combined.

In New England, where straw is scarce, manure cellars under the barns and stables are common. The liquid and solid excrements are droped through trap doors into the cellar beneath. It is necessiry in this case to provide dry peat or muck to absorb the

In this section, however, and throughout the Western States and Upper Canada, where straw for litter is usually abundant, we think menure collars in most cases ere unnecessary. By spouting all the buildings | cases. and sheds, the menure heap can be so managed that it will absorb nearly or quite all the rain that falls upon it, as well as the liquide from the cattle and horse etables. The happone that there is a straw stack in the barn-yard, and immediately around the steck there is a large mount of wet, refute alraw, which of itcelf will hardly forment at all, to. and which, if it did, would make manure of little value. This should be spread about the yard, thereby adding to the comfort of the animals and the value of the manure heap.

We could wish that every barn-yard had a tank in which the liquids could be preserved when in excess, and from which they could be pumped back when the manure It let, 1800, heap became too dry. We are satisfied that Ames John such a tank would pay for itself in a year on Alleyn J F an average elze farm. Into this tank we would throw a few bushele of plaster (sulphate of lime.) This, in colution, would fix all the ammonia, not only in the liquid itself, but also in the manure heap when it Dormand William wes pumped on to it. To carry out the method we have save- Draper S H

cated, it is necessary to have a good wheel. Forkie Charles barrow. Without it we have found that the Goode William short portions of the manure ard left near the stable doors, while the more littery portions are drawn or thrown to a greater distance. A few planks laid on the heap would greatly lesson the labor of wheeling. When manure is thrown into a loose heap.

it is apt to ferment rapidly, and in some inctences to "fire fang." When this is the Armstrong Mies Elise-Lloyd Eli case, there can be no doubt that there is a great loss of ammonia. To avoid this, we need compression and more moisture. If we have a tenk; the latter is easily supplied, Curry Eleada K and when the manures are distributed evenly | Cayler Thompson over the yard, the cattle will tread it down | Cuyler William. sufficiently solid to prevent all injurious for | Cuyler Stephen mentation.

A few store hogs should always be allow-Elldaridge Mrs ed access to the barn-yard. They will pick Field &Co Michel up much that would otherwise be wasted, Falkuer Alford and they will materially essit in mixing the Graham John manure, through they necessitate a little Heacock Thos more care in levelling the heap. It should never be forgotten that the value | Look John T

of the manure depends on the food consumed by the animals. However well we manage the manure heap, the manure will be of comparatively little value if the animals are fed on nothing but straw. We must have rich food before we can have rich menure.

## JUDSON'S Mountain Horb Pills.

Above, we present you with a perfect likeness of Yester, a chief of a tribe of the strange Aster Nation, that ones ruled Mexico. You will find a full account of him and his people in our Pamphlets and Almanace—to be had gratte, from the Agents for these Pills.

The inventor and manufacturer of "Judeon's Mountain Herb Pills," has spent the greater part of his life in braveling, having visited nearly every country in the world. He spent over six years among the Indians of the Rocky Mountains and of Mexico, and it was thus that the "Moravais Here Pills" were discovered. A very interesting appoint of his advantures there, you will find in our Almanac and Pamphlet.

It is an established first, that all discuss arise from

ESPURE BLOOD!

The blood is the life I and when any foreign or unboults, matter gets mixed with it, it is at once distributed to every organ of the body. Every neares feels the policin and all the vital organs quickly complain. The element will not digest the find perfectly. The liver ceases to secrete a sufficiency of bile. The action of the heart is weakened, and so the circulation is feetles. The large become clogged with the poleconous matter; beace, a cough—and all from a slight impurity at the fountainhead of life—the Elood! As if you had thrown some carth, for instance, in a pure apring, from which san a they risulet, in a few minutes the whole course of the altern becomes disturbed and discolored. As quickly does impure blood fly to every part, and leave its sling techind. All the passages become obstracted, and unless the obstruction is removed, the imp of life soon dies out. These pills not only purify the blood, but regenerate all the secretions of the body; they are, therefore, anxies lied.

CURE FOR BILIOUS DISEASES, Here Complaint, Eich Headache, &c. This Anti-Billions Medicine expels from the blood the bidden suche of discase, and renders all the finish and secretions pers and fount, clearing and requestitating the vital organs.

Flushest indeed, is it to us, that we are able to place within your reach, a medicine like the "Mouveaux Here Falls," that will pass directly to the afflicted parts, through the blood and faths of the body, and cause the sufferer to brighten with the fash of beauty and sealth.

Judion's Pills are the Best Remedy in existence for the following Complaints: Bond Omplaints, Delling, Inward Weaknest, Oughs, Poor and Agus, Liver Omplaints, Notes, Possels Complaints Learness of Spirits, Chat Discount Headaches, Piles, Pil Pila, Bine and Oresd. Boundary Egra-Indigestion, Exforma Inhammation,

GREAT FRUALE MEDICINE! Penceles who value health, should nover be without these Pills. They purify the blood, remove chalenotions of all kinds, channes the skin of all phopies and blotches, and bring the rich color of health to the puls should Any The Pients and Harte of which these Pills are exact, were discovered in a very surprising way among the Tenneaut, a tribs of Aberighns to Manley. Get the Almenes of our Agent, and you will read with delight, the very interesting account it contains of the "Cunar dissecurate of the Asteca." Observe. The Mondain Hot Pills are put up to a Breakful Wropper. Each bea contains 40 pills, and Briak at 50 cmts per top. All provins, have the expendent of U. L. JUDSON & CO., on each ten.
